

WEYROC PROTECT

Weyroc Protect, made from P5 flooring grade chipboard, is faced with thermosetting resin impregnated Kraft paper on both sides of the board providing double protection and preventing moisture ingress.

Weyroc Protect is CE certified and possesses the coveted BBA certificate both for the board and for use as a component in the Rapid Deck floor laying system (see page 6). Ideal as a floor across joists, Weyroc Protect can be exposed to the elements for up to 42 days during the building process and can be laid during light rain thus reducing weather related stoppages and resulting in speedier completions.

When glued properly with Weyroc D4 Adhesive (see page 5), Weyroc Protect requires no sealing tape, leaving you with a fully sealed working deck. This finished deck protects against site spoil, impact, wear and tear of heavy site traffic and moisture.

Weyroc Protect's unique anti-slip surface provides additional foot holding in wet and dry conditions which is of significant benefit to site safety. Weyroc Protect is the ideal solution for builders requiring a safe working platform during house building construction.

Weyroc Protect meets Health and Safety requirements and current Part E/L requirements (Part J/H in Scotland).

Weyroc Protect is the only board that we recommend to be left exposed to the elements during the building process. It is also the only board that we recommend for use as a floating floor and for use with under floor heating.

WEYROC PROTECT - THE BENEFITS

- **PROTECTS** - against the elements - Weyroc Protect, once correctly laid, can be left exposed for up to 42 days during the building process whatever the weather!
- **PROTECTS** - Weyroc Protect is certified for use without joint sealing tape, saving time and money
- **PROTECTS** - against water and moisture ingress on BOTH sides of the board thanks to the fully sealed surface of Weyroc Protect
- **PROTECTS** - from slipping during wet and dry conditions supporting site safety
- **PROTECTS** - against site spoil, impact and wear and tear of heavy site traffic
- **PROTECTS** - budgets by helping to speed up the building process
- **PROTECTS** - long after the keys have been handed over
